Category:Android (operating system) software Category:Android-only Android softwareQ: How do I add data validation to a cell? This is the list of available data validation buttons in Excel. My question: Can I add an "other" button to that list? I want to add a button that allows the user to pick from a list of values that are not part of the current list of option buttons. For example, this screenshot shows the table below has three cells; "Date", "Wkly Sales" and "Qtr Sales". I want to give the user a choice of "Day" and "Week" when they type a date in the "Date" cell. Currently, the only options are the date values 1, 2, 3, 4, 5, 6, 7, etc. If the user enters the date "1/1/1997" then they should be presented the list of values "1/1/1997", "2/1/1997", "3/1/1997", etc. I think they would be presented a "Day" and "Week" dropdown list where they could select Day or Week from. Here is another example where I want to add the "other" button when the user types a value in the "Qtr Sales" cell. The list of available data validation buttons include Month, End Month, Quarter, Today, Week, Day, Weekday, Month, Quarter and Year. I would like to add the "other" value to that list. Also, how can I do the same thing for a table where each cell in the table has a different control? A: The link in my answer to user1986692 provides a list of all valid options, but below is a more robust "create your own" way of getting all the data validation options that provide yes/no validation in a tabular interface. Note: the link to the Microsoft page suggests a date of 10/29/2016. However, the link that I included is the latest version at the time of this writing, so be aware that it may change in the future. Open Tools > Data Validation Choose "Custom Formula" The first cell we need to add data validation to is the cell below the one we want to be able to select a range of dates. To do this, the first cell with a data validation option is selected, then

WANTED - Women in their early to mid 20s, brown hair, blue eyes. Her husband is me. We are newlyweds, and she still goes to classes. I was looking for a short date last night, but she called to let me know that she was working that night. Sorry Stacie... :p I need my husband to give me a good BJ. He's never gotten in on this one before. I think he'd be more than happy to do it, though. I'm sure he would. The only thing he would ask in return is if he would get to fuck me afterwards. I would be more than willing to please him in that regard, but I'd really like to get me some well-lubricated pussy. I might even get my bj by the end of the night. Of course, my husband is more than willing 3ef4e8ef8d
