## What's New in the Project Manager?

Project Manager is a multi-user GTD application. The software helps you stay organized by storing all the information about your tasks in individual projects. You can also use your projects as a logical overview of your work. Project Manager allows you to easily keep track of all your personal tasks, and customize your system by adding several templates, supporting files and saving projects on a disk. Once the project is saved, the number of lists the project contains is set by default and these lists are kept together with the project. The lists are for different lists, and each list has a title that appears on the project and in the QuickView. The project contains all your tasks, so you can sort them and set alarms for each of them. You can also write notes on each task. The application is divided into two sections: the Main screen, and the QuickView, a main visual guide to the project. Project Manager is designed to support adding new list, tasks and reminders. You can also configure the system, create templates, import and export lists, and customize the QuickView, using simple and efficient forms. You can store any documents, photos, video and music files inside the project. Also you can create one project for a folder on your computer, and another one for a drive. You can access the project with a password, using a series of characteristics. The list is divided into several categories: "You", "Company", "Receive", "Inbox", "Lists" and "Groups". You can start new projects using templates, and you can assign tasks to members of your team. Project Manager is compatible with: ? Windows 7, Windows Vista, Windows XP ? Mac OS X 10.5+ ? Linux 2.6+ Each of the 3 versions includes the same features, but it is necessary to install each one using separate installation Advanced Mode allows the user to edit project information and its settings, such as creation date, duration and an unlimited number of notes, reminders and tasks. You can also create task lists and sub-projects, and use the quick view to find these tasks. Customize a project by creating lists, projects and tasks. Customize tasks using the "Reminders" and "Marker" features. You can also create new tasks and remove tasks from a project with one click. Create an unlimited number of tasks in one project, one at a time, by using the "Create New
