I.Softsoft.com -- . A: After the hard work to install Geovid VidLogo 3.6.0.46
Portable I.Softsoft.com - I found an option that allows the maximum resolution of
your video played on your computer. This resolution was not available on my
computer so I could not change the video resolution. Below shows the windows that I
found. But after that I could able to do some minor adjustments. Below shows the
video after adjustments If you also want a similar option on Mac I suggest to
purchase the license. Refer: Q: Unstable Apex Trigger with Multiple Optional
Parameters I have a relatively complicated trigger that I have adapted from various
sources to get the job done. I need to have a combination of required and optional
parameters, but when I try and use an undefined parameter I am getting various
compiler errors and I am struggling to determine what I am doing wrong. I am getting
my head around the concept of optional parameters, but I need to have the ability for
multiple of them. Here is my code: trigger ProjectItem on Project__c (after update)
    { List projects = new List(); List p = [SELECT Id, Name__c,
    Visual_3_Dimensional_Field_on__c, Visual_2_Dimensional_Field_on__c,
    Visual_Dimensional_Field_on__c, Static_Field_on__c FROM Project__c]; for
    (Project__C p: p){
