"A Peer-to-Peer Electronic Cash System" is a description of the inner workings of a cryptocurrency. In 2008, the "what" was becoming clearer for some people, but the "how" and the "why" remain a mystery to this day. Here is a quote from the white paper that describes the inner workings of a cryptocurrency; "What is needed is an electronic payment system based on cryptographic proof instead of trust, allowing any two willing parties to transact directly with each other without the need for a trusted third party." (Bitcoin Whitepaper, 2008) This quote reveals to us that cryptocurrency is based on the idea of money being a system that is trustless and where the recipient can verify the transaction between the sender and the recipient. In December 2009, Bitcoin began trading on the open market and by the end of January 2010, its value had risen sharply. Bitcoin was at less than $10 cents on February 2, 2010, and by February 4, 2010, it hit $17.36 cents, and continued rising from there. The reason for this rise, and the subsequent volatility that Bitcoin experienced, was because the value was based on supply and demand. Once the demand started to outstrip the supply, the value went up. There were several enthusiasts in the Bitcoin community during these times. These people were known as Nakamoto 's Nobby and J.D.'s, and they both believed in the early network effects that would support Bitcoin as its value became more and more widely used. All users were required to download the software (known as the bitcoin client), and each user has a private key that was his or her public key and, of course, the public key of the person to whom the sender wants to send the cryptocurrency. Bitcoin has a built in difficulty mechanism that limits the rate at which new bitcoins can be mined to allow the price of a bitcoin to fluctuate. This added stability to the market and made the currency more appealing to more people. Bitcoin was now in a position to continue to grow, and the initial difficulty increased to make the Bitcoin network harder to mine. By the end of May 2010, Bitcoins were worth over $12.50, and by the end of July 2010, the value was rising again. On August 12, 2010, the second halving of the number of Bitcoins that are distributed every 10 minutes occurred, and it was predicted to see the value of a a681f4349e

Workers Comp Blog The OSHA Right to Know Poster Reporting System While working in your community you may be expected to answer a call or make a visit to an accident site. Since the OSHA Right to Know Poster Program was implemented, employers and workers have the opportunity to report the details of the injury, not only to OSHA but to themselves through this online reporting system. The OSHA poster is a commonly found tool in public places and is meant to serve as a means for individuals to report worker safety, health and illness conditions. To report an accident it is only necessary to locate one of the OSHA posters, and one will always be placed at the accident scene and at the place of the incident. At the accident scene, the poster will either be located on a sign on the victim, or the poster will be placed on the ground. Some of the posters are affixed to poles or posts in public locations to provide the public with information about an impending accident. The poster is a common tool used by OSHA inspectors to verify the presence and location of the poster. The information provided within the poster is very concise, easy to read, and brief. An employee of the employer can make a report within minutes of the accident. When reporting an injury, it is very important to include the time, date, work shift, and the level of the injury that occurred. The OSHA posters are meant to be available at any given location, so it is important to keep the poster and continue to maintain its proper location. Vandalism of the poster is a violation of OSHA law, and when employees or others see a poster that has been purposely torn or defaced, they should notify OSHA immediately. The poster is a means of communication that is meant to be available to the public, and OSHA will exercise its legal right to use the Right to Know poster. There is no requirement for an inspector or employee to be present when a poster is being reported. Without the use of the OSHA poster, the employer would be required to investigate the accident site and submit a report to OSHA. Since the Right to Know poster is available at any given place, the reporting of injuries is easy and efficient. The poster is a helpful and a cost-effective way for workers to report accident sites and injury conditions. If you have any further questions about the OSHA poster or the Right to Know program, you are welcome to contact Marijke Cupp. Call us

Sakhi Hoon Main Sakhi Hoon Main (English: Sakhi and Love), a 1961 Bollywood film, is about a Sikh girl who is in love with an orthodox Hindu boy. The movie was produced by Dhirubhai Ambani. Plot Dharam (Rajendra Kumar) is a banker and Dharma (Jayshree T. Telang) is a lawyer. They are young and beautiful. They have a child, Sohan, who is born a male. Dharma agrees to marry Dharam, but on the day of their wedding, Sohan is born a female. Dharam's parents are worried and send him to a Sikh holy place to seek help, but he comes back in time to claim his wife. Dharam's sister is also a Sikh holy woman, who also comes to identify Sohan as a female, claiming her as her own. Sohan's mother, however, is adamant that she is Dharam's daughter. When Sohan reaches the age of 16, she is due to be married to an opportunistic Brahmin who says that the girl is not yet married, and is rather old. Dharma now has to decide which way she wishes to go. She wishes to honour her mother-in-law's wishes, but Dharam insists that Sohan is his daughter. Sohan is allowed to be a part of Dharam's family, and Dharma has to learn to accept Sohan as her daughter. Cast Jeejala as Sohan Rajendra Kumar as Dharam Mohini Choti as Harmat Rai Jayshree T. Telang as Dharma Nirupama as Dharam's mother Tej Sapru Uma Asrani Rehana Sultan Manmohan Krishna Manohar Hana Music The music was composed by Laxmikant-Pyarelal and lyrics were written by Pandit Ravindra Nath. The number "Main, Humko" (Sakhi Hoon Main) is considered the signature song of the film.
