Roblox is an online game platform and game creation system developed by Roblox Corporation that allows users to program games and play games created by other users. Created by David Baszucki and Erik Cassel in 2004 and released in 2006, the platform hosts user-created games of multiple genres coded in the programming language Lua. For most of Roblox's history, it was relatively small, both as a platform and a company. Roblox began to grow rapidly in the second

half of the 2010s, and this growth has been accelerated by the COVID-19 pandemic. Roblox is free to play, with in-game purchases available through a virtual currency called Robux. As of August 2020, Roblox had over 164 million monthly active users, including more than half of all American children under 16. Although Roblox has received generally positive reviews from critics, it has faced criticism for its moderation, microtransactions, and exploitative practices directed toward children. Fifty-three consecutive patients with radiologically detected acetabular fractures were evaluated. Eleven patients had additional associated injuries to other skeletal systems. In 43 (81%) patients, the acetabular fracture was closed and nine (17%) were open. Eight (15%) patients

had heterotopic ossification (HO). Acetabular fractures are associated with a variety of intra- and extra-articular injuries that may require aggressive surgical management. CT is the best tool to evaluate these injuries and HO. The acetabular fracture and associated injuries are evaluated on CT scans to identify the associated injury, which may alter the management. CT scans are most useful in determining whether the fracture is open or closed; whether there is any associated injury; and if HO is present. Château de
